Objective

As a motivated and detail-oriented software engineering fresher, I seek a dynamic and challenging role where I can apply my technical skills and contribute to innovative solutions. Eager to learn and grow within a collaborative team environment, I aim to leverage my programming knowledge to contribute effectively to the success of the organization.

Projects

Reflow :- [Demo Link **]**

Reflow is a modern agency-style portfolio website built with React and Node.js, featuring smooth animations, dynamic content, and a premium visual experience inspired by Reflow. It showcases branding, web design, and creative, development through a fully responsive, production-ready setup.

Tiny Link :- [Demo Link **]**

Build a full-stack URL shortener using React, Node.js, Express, and PostgreSQl. Implemented custom short links, click tracking, and deployed the application using Vercel, Render, and Neon. Allows users to shorten long URL into clean, shareable links and track their usage.
