Objective

As a motivated and detail-oriented software engineering fresher, I seek a dynamic and challenging role where I can apply my technical skills and contribute to innovative solutions. Eager to learn and grow within a collaborative team environment, I aim to leverage my programming knowledge to contribute effectively to the success of the organization.

Projects

VideoLibrary :- [Demo Link **]**

Built a complete video library platform with authentication, admin panel, video CRUD operations, category filter, and responsive UI using React, Node.js, Express.js, and MongoDB. Implemented JWT authentication, YouTube embedding, protected routes, and deployed on Vercel + Render.

ShoppingOnline :- [Demo Link **]**

Smart Shopping is a full-stack e-commerce web application where users can browse products, filter categories, add items to the cart, register/login, and place orders. Implemented secure authentication, dynamic product rendering, and shopping-cart persistence using Local Storage & backend APIs. Deployed the frontend on Vercel and backend on Render.

ToDoList :- [Demo Link **]**

Built a production-ready full-stack To-Do Application featuring user registration, login authentication, and complete CRUD operations for managing tasks/appointments. Developed REST APIs using Node.js and Express and secured persistent storage with MongoDB Atlas. The frontend was built using HTML, CSS, and JavaScript (jQuery) and deployed globally on Vercel.
